1. Overview

The GGBN Attendance Tracker is a fully self-contained attendance management system built for ROTC programs. It runs entirely inside a single HTML file — no server required, no installation, no subscription fees. Open it in any modern browser on any device and it works.

Key Principles

- Single HTML file — share via email, USB, or GitHub Pages
- All data stored locally in the browser — nothing leaves your device
- Works offline after first load when installed as a PWA
- Mobile-friendly — fully responsive for phone and tablet use
- Multi-school — each school maintains completely independent data
- One-click backup and restore — move data between devices instantly

2. Getting Started

No installation is required. To start using the tracker:

Step 1 — Open the file	Double-click GGBN_Attendance_Tracker_v4.html or drag it into any browser window (Chrome, Edge, Firefox, or Safari).
Step 2 — Configure your school	Go to Settings → enter your school/unit name and current semester. This name appears in the sidebar and on all exports.
Step 3 — Review your roster	The tracker comes pre-loaded with the GGBN roster. Go to Roster to add, remove, or edit members. Update MS levels and contracted status.
Step 4 — Record your first session	Go to Record → enter a session name and date → mark each member Present, Absent, or Excused → Save.
Step 5 — Back up your data	Go to Export → Download backup → save the .json file somewhere safe (Google Drive, email to yourself, USB drive).

3. Navigation & Tabs

On desktop the sidebar is always visible on the left. On mobile a tab bar appears at the bottom of the screen — scroll it horizontally to reach all tabs.

■ Record	Create a new attendance session and mark members P/A/E
■ Extra Activity	Record Volunteer, Color Guard, Ranger Challenge, or Fundraiser events
■ Sessions	View and manage all past attendance sessions
■ Roster	Manage members — add, edit, search, filter, and view profiles
■ Stats	Attendance rates, squad summaries, weekly trends, per-person data
■ Overtime Stats	Extra activity leaderboard — does not affect attendance rate
■ Schools	Create and switch between school profiles
■ ■ Safety	Emergency contacts, at-risk members, and safety notes log
■ ■ Settings	School identity, semester, emergency contacts, semester reset
■ Export	Download CSV reports, styled Excel files, email summary, backup

4. Recording Attendance

Attendance sessions are the core of the tracker. Each session records a single event with a name and date.

Creating a Session

Session name	Describe the event — e.g. "Weekly Drill", "PT", "Lab", "SUPERLAB"
Date	Select the date of the event
Bulk actions	"All Present", "All Absent", or "All Excused" buttons mark everyone at once
Saving	Click Save Session. If any members are unmarked you will be prompted to confirm.

Attendance Status Codes

Code	Label	Effect on Rate	Color
------	-------	----------------	-------

P	Present	Full credit	Cyan
A	Absent	Reduces rate	Orange
E	Excused	Full credit — no penalty	Green

Important: Attendance Rate Formula

- Rate = (Present + Excused) ÷ Total Sessions × 100%
- Excused absences are treated as full credit — school priorities and schedule conflicts are respected
- Only unexcused Absent marks reduce a member's attendance rate

5. Extra Activities

Extra activities are completely separate from attendance. They track participation in bonus events and never affect attendance percentages. They are a recognition system.

Volunteer	Community service and volunteer events
Color Guard	Color guard ceremonies and performances
Ranger Challenge	Ranger Challenge competitions and training
Fundraiser	Fundraising events and activities

Instead of P/A/E, each member is simply marked as attended or not. Results appear in the Overtime Stats tab as a leaderboard.

6. Roster Management

The Roster tab is where you manage all unit members across all squads.

Adding Members

Full name	Enter in Last, First format — e.g. "Reyes, Kurt"
Squad	Select from the dropdown — squads can be renamed or new ones added
MS Level	MS1, MS2, MS3, or MS4
Contracted	Yes or No — contracted members appear bold and highlighted
Email	Optional — stored in the member profile

Search & Filter

A live search bar filters the roster by name, squad, or MS level as you type. Filter chips let you show only Contracted, Not Contracted, MS1, MS2, MS3, or MS4 members.

Managing Squads

Click "Manage Squads" to expand the squad editor. You can rename any existing squad or add a new one. All member assignments and historical data update automatically.

7. Member Profiles

Click any member's name on the roster to open their profile. The profile has three tabs:

Info tab	Shows attendance stats (P/A/E counts and rate), extra activity counts, contact info, MS level, contracted status, squad, and school
Attendance tab	Full session history grouped by week. Each week shows its overall % and can be expanded to see individual sessions with P/A/E status
Edit tab	Edit first name, last name, email, squad, MS level, and contracted status. Save or remove the member from here.

Data Quality Indicators

- ↑ Trend arrow — attendance improving compared to earlier sessions
- ↓ Trend arrow — attendance declining compared to earlier sessions
- → Trend arrow — attendance steady
- ■ Red badge — member has 3 or more consecutive unexcused absences

8. Statistics & Analytics

The Stats tab shows a complete picture of unit attendance.

Global stats	Total sessions, overall attendance rate, present/absent/excused counts, and total members
Squad summaries	Attendance rate per squad with a color-coded progress bar
Weekly chart	Attendance % per week. Click ▼ on any week to expand and see each individual session's rate, name, date, and P/A/E counts
Per-person summary	All members sorted by attendance rate. Shows P/A/E counts, rate bar, status (Good/Monitor/At Risk), trend arrow, and consecutive absence badge. Searchable.

Status Thresholds

Status	Threshold	Bar Color	Action Required
Good	80% and above	Green	None
Monitor	60% – 79%	Amber	Squad leader follow-up
At Risk	Below 60%	Red	Immediate welfare check

9. Overtime Stats

The Overtime Stats tab is a recognition system for members who participate in extra activities. It has no connection to attendance rates and is purely for rewarding those who go above and beyond.

Global stats	Total events, total participations, unique participants
By category	Bar chart showing participation breakdown across the four activity types
Leaderboard	All participating members ranked by total extra activities, with ■■■ medals for top 3 and per-category breakdown under each name
Sessions list	All extra activity sessions with type, name, date, and attendance count. Individual sessions can be deleted.

10. Safety Information

Attendance thresholds	Policy guidelines displayed prominently — 60% floor, 3 consecutive absence rule, excused absence submission window
Emergency contacts	Editable per semester. Shows PL, PSG, emergency number, campus security, health/mental health line. Update at the start of each term.
Absence classification	Reminder of what P, A, and E mean and their effect on the rate
At-risk members	Auto-populated list of anyone below 60% after at least 2 sessions. Shows name, squad, rate, and absence count.
Safety notes log	Log welfare concerns, incidents, or follow-ups tied to a date and member name. Exported in the safety CSV report.

11. Settings

School identity	Set the school/unit name and current semester. Name appears in the sidebar and on all exports.
Emergency contacts	Add, edit, or remove contacts. Linked to the semester — update each term.
Semester reset	Archives the current semester (auto-downloads a backup first), clears all sessions and activities, preserves the full roster, and starts the new semester.
Theme color	Choose from 10 preset swatches or enter any custom hex color. Updates the accent color across the entire app and on exported Excel files.
Light/Dark mode	Toggle between dark (default) and light mode. Preference saves across sessions.

12. School Profiles

The Schools tab lets you run completely independent instances for multiple schools from the same browser. Each school has its own roster, sessions, contacts, settings, squads, and theme color.

Create a profile	Enter school name, semester, and pick an accent color. A new empty roster is created automatically.
-------------------------	---

Switch schools	Click a school card to switch. Current data saves automatically before switching.
Delete a profile	Permanently removes the school and all its data. Cannot delete the currently active school.
Active indicator	The current school shows an "Active" badge. School name also appears in the sidebar header.

13. Export & Reports

All exports are generated directly in the browser — no server involved. Excel exports require an internet connection to load the ExcelJS library.

CSV Reports

All Sessions (CSV)	Every member as a row, every session as a column, with P/A/E values. Includes MS level and contracted status.
Per-Person Summary (CSV)	One row per member with total P, A, E counts, sessions attended, and attendance rate.
Weekly % Report (CSV)	One row per week with credited attendance count, total slots, and percentage.
Safety Report (CSV)	All members with P/A/E counts, rate, and Good/Monitor/At Risk status. Includes safety notes.
Overtime Report (CSV)	Participating members with total extra activities and per-category breakdown.

Excel Reports

Weekly Report (Excel)	Styled like the original ROTC attendance form. One sheet per week. Color-coded P/A/E cells, contracted members in bold blue, gold platoon headers, dark squad headers, per-squad summaries, unit totals, and a key legend.
All Sessions (Excel)	Full semester view with weekly summary columns. Each week shows a color-coded attendance % per person. Click [+] in Excel to expand any week and see individual date columns. Three sheets: All Sessions, Score Data, Overall Chart.

Email-Ready Summary

Generates a plain-text report you can paste directly into an email to leadership. Contains:

- Overall unit attendance rate
- Squad-by-squad breakdown with % and status tag per squad
- Week-by-week attendance with individual session detail
- At-risk members list with names, squad, rate, and consecutive absence flags
- Top extra activity participants

14. Backup & Restore

The backup system is how you move data between computers, share data with others, and protect against data loss. A backup is a single .json file that contains everything.

What a backup includes

- Full roster with MS levels, contracted status, and email
- All attendance sessions and marks
- All extra activity sessions
- Emergency contacts
- Safety notes log
- School name, semester, and settings
- Squad names (including custom names)
- Theme color

Download backup	Export → Download backup. Filename includes school name, semester, and date.
Load backup	Export → Load backup file → select the .json file → confirm. All data is replaced immediately.
Auto-backup	The semester reset automatically downloads a backup before clearing data.
Best practice	Download a backup after every major session or at the end of each week. Store in Google Drive or email to yourself.

15. Installing as a PWA App

The tracker is a Progressive Web App (PWA). When hosted on HTTPS, it can be installed to any home screen or desktop like a native app — with its own icon, full-screen mode, and offline support.

Android / Chrome

- Host the file on GitHub Pages (see Section 16)
- Open the URL in Chrome
- An "Install as App" banner appears at the bottom — tap Install
- The app appears on your home screen

iPhone / Safari

- Open the hosted URL in Safari
- Tap the Share button (square with arrow)
- Tap "Add to Home Screen"
- Tap Add — the app icon appears on your home screen

Desktop (Chrome or Edge)

- Open the hosted URL
- Click the install icon in the address bar (or the banner)
- The app opens in its own window without browser controls

Offline Support

- Once installed, the app works completely offline
- Attendance can be recorded with no internet connection
- Excel exports require internet (ExcelJS CDN)
- Service worker caches the app after first load — uploads sw.js alongside index.html on GitHub Pages

16. Hosting Online (GitHub Pages)

GitHub Pages hosts the file for free on a permanent URL accessible from any device.

Create account	Go to github.com and create a free account
New repository	Click + → New repository. Name it ggbn-attendance. Set to Public. Click Create.

Upload files	Click "uploading an existing file". Upload GGBN_Attendance_Tracker_v4.html and sw.js.
Rename HTML	Click the HTML file → Edit (pencil) → rename to index.html → Commit.
Enable Pages	Settings → Pages → Source: Deploy from branch → main → Save.
Access your URL	After ~60 seconds: https://YOUR-USERNAME.github.io/ggbn-attendance

17. Attendance Calculation Rules

Basic formula	Rate = (Present + Excused) ÷ Total Sessions × 100%
Excused absences	Count as full credit. No penalty. School priorities and schedule conflicts are fully respected.
Unexcused absences	Reduce the attendance rate. The only status that counts against a member.
Unmarked sessions	Sessions where a member has no mark do not count toward present or absent — they are excluded from that member's denominator.
At-risk threshold	Calculated after a minimum of 2 sessions. Any member below 60% appears in the At-Risk list on the Safety tab.
Trend calculation	Compares the most recent half of sessions to the older half. Requires at least 4 sessions to display.
Consecutive absences	Counts unexcused absences streaking from the most recent session backward. Resets on any P or E mark. Badge appears at 3+.
Weekly % in weekly chart	Sum of all credited (P+E) marks across all sessions in the week ÷ (roster size × number of sessions that week).

18. Troubleshooting

Data disappeared	Data is stored in browser localStorage. Clearing browser data or using incognito mode will lose data. Always maintain a backup .json file.
Excel export not working	The Excel export requires an internet connection to load the ExcelJS library from CDN. Check your connection and try again.
Install banner not showing	The PWA install prompt only appears when the app is served over HTTPS. Running from a local file:// path will not show the banner.
Service worker warning	"SW registration skipped" is normal when running locally. It registers automatically once hosted on GitHub Pages.
Stats not updating	Navigate away from the Stats tab and back — it refreshes on every tab switch.
Backup won't load	Make sure you're loading a .json file exported by this app. CSV files are not compatible with the restore function.

School switch lost data	Data is auto-saved before switching schools. If data appears missing, switch back to the previous school profile.
Search not working	Make sure you are on the Roster tab and typing in the search bar at the top of the All Members section.

GGBN Attendance Tracker · Version 4 · Spring 2026
Built for ROTC Programs · Single HTML File · No Installation Required
